

[Dr. Rupam Borgohain](#), is a Professor of Neurology at Nizam's Institute of Medical Sciences (NIMS), Hyderabad. He is a dedicated to patient care and student mentorship, with expertise in movement disorders especially dystonia and Parkinson's disease. He started the DBS programme in NIMS with more than 300 surgeries conducted under his stewardship since 2000.

He has also conducted numerous clinical trials, mostly in Parkinson's disease - notable among them being Safinamide which he published as the lead author in Movement Disorder. This received EMA clearance in Europe (2014) and is under FDA consideration currently.

He has established an Indian network of researchers in movement disorders (Parkinsons Research Alliance of India- PRAI) with Prof. Kapil D Sethi and Prof Madhuri Behari and is striving towards collaborative research.

He has published several papers in various national and international journals, has conducted multiple symposia, workshops, conferences and has delivered lectures and talks worldwide.
